Petersburg, VA 23805**

“Happy plants, bugs, and earth...Happy you!!!”

You, too, can create a well designed landscape.

“Water! What the H2O?”

This discussion will help you understand how conservation of water through Rain Gardens helps return water to our aquifer. Glenn will explain the importance of re-contouring, erosion control and collection systems. **Glenn F. Chappell, II, Ph. D.,** Associate Professor Plant and Soil Science, Virginia State University

“Creating Native Neighborhoods”

Anita will share information about native trees, shrubs and perennials that are well-adapted to some of Virginia's soil and climate challenges. Find out what native fauna those specimens support. Explore how you can establish small ecosystems using a group of plants that are complementary to one another. **Anita Tuttle, MS and BS in Horticulture,** Virginia Tech, Master Gardener, Virginia Native Plant Society

“Using Hardy ferns in the Landscape”

Jim will present a very comprehensive discussion of ferns that are hardy to the

climate of the Mid-Atlantic States. His slides will illustrate landscape applications for ferns and identification of ferns. He will talk about seasonal interest of ferns in the landscape. He will provide resources to learn more about ferns. **James M. Orband,** Senior Extension Agent Emeritus, Advanced Virginia Certified Horticulturist #632

“Bringing Bugs Home”

This presentation offers an overview of insects and entomology in Virginia and introduces some common species found in the Commonwealth. Evans recounts his efforts to replace a lawn in suburban Richmond with native plants to attract and sustain insects and other wildlife. **Arthur V. Evans, D. Sc.**
